# BioDigest

## **DIRECTIONS FOR USE:**

To digest solids in liquids, dissolve BioDigest in warm water and dump the solution into the liquid being treated. One (1) pound of BioDigest can treat up to one million gallons of liquid with moderate solids content. For liquids with high organic solids content such as manure lagoons, higher application rates may be employed where quick digestion is desired.

For application on solid surfaces such as compost piles, dilute BioDigest in warm water, and spray on materials to be digested/composted.

One (1) lb. of dry BioDigest covers up to 20,000 square ft. of surface area to be treated.

***Special Note:*** Dilute with sufficient water to achieve a minimum of 35% moisture content after spraying to insure that the enzymes and microbes in BioDigest are fully active.

## **FIRST AID:**

**Inhalation:** Remove victim to fresh air. If breathing has stopped give artificial respiration. Give oxygen if breathing is difficult.

**Ingestion:** Call a physician immediately. DO NOT Induce vomiting. If conscious, have victim drink large quantities of water.

**Skin Contact:** Remove contaminated clothing. Wash skin with soap/water. Launder clothing before reuse.

**Eye Contact:** Immediately flush eyes w/water for 20 minutes, while retracting eyelids. Seek Medical advice.
